

REFRIGERATOR AND FREEZER REBATES

The ABC's of Refrigerator/Freezer Recycling

You too can save using the new math: $A+B+C = Savings!$

A. Amazed!

You'll be amazed by how much recycling your old energy hog refrigerator can save. On average a newer refrigerator or freezer consumes 1,000 fewer kWh annually than a refrigerator or freezer manufactured before 1990.

Math lesson:
Using less kWh = \$ in your pocket

B. Buy ENERGY STAR®

A new and efficient ENERGY STAR refrigerator or freezer can save you up to \$150 a year in energy costs.

C. Call Us!

We'll take that old clunker off your hands for FREE and you'll earn a cool \$50 in the process.

To schedule your FREE pickup, call 877-270-3520 or visit NJCleanEnergy.com/REFRIGERATOR

Plus, if your fridge is the state's oldest, you'll win a \$1,000 gift card for a new ENERGY STAR appliance from Sears -- but only if we pick up your unit by September 30th!

Don't miss out! See [contest rules](#) for more information.
